Braintree, Massachusetts 02184-3839

Your Eminence,

It is most gracious of you to write those words of encouragement.

I will continue to remind those dear to me that indeed worship is the ultimate expression of love and submission to Almighty God.

And say to them "How could we love Him if we don't know Him".

We participate in rituals in the hope of being enlightened enough to establish a bond with The Living, Manifest Truth our Creator. The Ultimate Truth will enable us to understand our young when they talk about Higgs boson or when physicists like Joseph Lykken talks about the beginning and the future of the universe.

We will be then be able to compare it with the revelations and appreciate how far the physicists have come.

We are beautifully reminded seven times that He is infinitely fine and delicate in His ways. He has made it possible for us to know how and of what we and this universe is made.

Understanding it we un-hesitantly say "Subhaanaka Allahuma".

We praise Almighty God, but who are we to praise Him? Jesus and the prophets praised Him and He praises Himself.

May He always be your protector.

Sincerely,

Ismat Ullah Nawabi MD.
